Gary, as recently mentioned and described in the attached letter, GE would like to dispose of the fish carcasses derived from the 2011 and 2013 Hudson remedial action monitoring program fish collection. The carcasses are stored at the contract laboratory, Pace. The lab would like to dispose of the carcasses mid-next week in preparation for this year's fish collection and processing. So Pace will proceed with carcass disposal unless EPA or the Trustees want any of the carcasses. If you or the Trustees do want any of the carcasses, could you and the Trustees notify GE by the close of business on April 28?

Thank you and please let us know if there are any questions – Adam
